BOARD CERTIFIED IN SCHOOL PSYCHOLOGY  
LICENSED PSYCHOLOGIST

**TESTING REMINDERS**

1. Remember that I want to see your child at his or her *best*. That means that he or she should get as much rest as possible the night before, and that you should call me if your child is not feeling well or is taking *any* medications of which I am not aware. Because many medications can impact testing performance, we may need to reschedule.
2. Plan to remain in the waiting room throughout all of the testing sessions. We will take several breaks during each testing session, and during which your child will return to the waiting room to rest and relax with you.
3. Please bring several snacks and beverages for your child to each testing session.
4. Bring mid-morning and early afternoon doses of any prescription medications that your child may need to take during testing.
5. Please bring your child's prescription eyeglasses with you, even if required only for distance work
6. Although individual testing is usually enjoyable and rewarding for children and adults, it is often exhausting as well, and you may want to plan your schedule accordingly.
